CHRISTIAN VAZ

Software Developer | Backend and Full Stack

Rutland, MA | (508) 963-5594 | ChristianTech77@gmail.com
github.com/christianvdev

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, HTML, CSS
Backend: Django, Django REST Framework, Flask, FastAPI, Node.js, REST APIs
Frontend and mobile: React, Vite, Tailwind CSS, React Native, Expo
Development tools: Git, GitHub, Jira, Swagger, API testing, unit testing, Agile development
Databases and deployment: PostgreSQL, SQLite; Render, Netlify, Railway, Vercel

SOFTWARE ENGINEERING EXPERIENCE

Springer Capital (Glynac AI) Apr 2025 - Jul 2025
Software and Network Engineer Intern | Remote

- Developed Django REST APIs and relational data models for production systems; performed PostgreSQL schema migrations and database updates.
- Built Python data-extraction services and third-party API integrations with endpoints for starting jobs, checking status, and retrieving paginated results.
- Wrote API tests and Swagger documentation, investigated backend defects, and incorporated code-review feedback during Agile sprints tracked in Jira.

PROJECTS

MotoTracker | Django, React, PostgreSQL, JWT

- Built a full-stack application for tracking motorcycles, riding hours, maintenance, and parts; launched publicly on Render and Netlify and gained registered users.
- Designed REST endpoints and relational data models for CRUD workflows; implemented JWT authentication, automatic token refresh, and user-scoped data access.

CodeNest | React, TypeScript, Vite, Monaco Editor

- Built a browser-based coding environment with HTML, CSS, and JavaScript file tabs, an iframe preview, and keyboard controls for running code.
- Added an export workflow that combines markup, styles, and scripts into a standalone HTML file users can run in a browser.

JobTracker | Django, React, PostgreSQL, Groq API

- Built an authenticated job application tracker and integrated the Groq API to turn job descriptions into structured application data.

ADDITIONAL EXPERIENCE

Acorn Education May 2026 - Aug 2026
Independent Web Development Instructor | Remote, self-employed

- Provided individual web development instruction, live debugging support, and written technical guidance.

Code Ninjas Oct 2025 - Jul 2026
Programming Instructor | Northborough, MA

- Explained JavaScript errors and guided students through testing fixes and understanding program behavior.

EDUCATION AND TRAINING

TEC Connections Academy | High School Diploma expected June 2027
Completed Coursera courses: Django Web Framework; React Basics; Git & GitHub; Troubleshooting and Debugging Techniques; Using Python to Interact with the Operating System; Crash Course on Python.
